

# Revit Collaboration Tools

## COURSE DESCRIPTION

Autodesk Revit is a Building Information Modelling tool used by multiple disciplines within the construction industry. During a project many individual designers and organisations can be working on the design of the building, making collaboration and coordination the utmost importance. Our course will enable delegates to increase their productivity whilst working with other individuals on a project, whether in the same or different organisations. This is a multi-disciplined course with practices for Architecture, MEP and Structural sectors.

## COURSE MODULES

- Set up Project Phasing
- Create and Display a Variety of Design Options
- Use Groups
- Link Autodesk Revit Files
- Use Multi-Discipline Coordination
- Import and Export Vector and Raster Files
- Understand, Use and Setup Worksets

## OTHER INFORMATION

### Prerequisites

You should be comfortable with the fundamentals of Autodesk Revit.

### Course Duration

1 Day

### Next Steps
